

# Grading Criteria for the Final Project

Each project is graded according to the following criteria:

Overall Project (70%+10%)		Functional Qualities (70%)	Required Functions	All required functions are implemented and demoed w/o bugs
		Additional Functions (10%)	Extra Credit (not listed in the table)	Implemented features that improves the usability and /or safety of the software
Documentation (30%)	Requirement (13%)	Requirement documentation (6%)	Completeness	Should cover all required and implemented system features
		User manual (4%)	Completeness	The user can get proper instructions on how to operate the system
		Weekly Meeting Reports (3%)	Completeness	All reports submitted on time
	Development (6%)	Specification	Completeness	Another developer can implement your system w/o ambiguities
	Validation(6%)	Validation Report	Testing	The testing procedure and results are well documented
	Presentation(5%)	Presentation	Completeness	Demonstration of system functions clearly within a short period of time

Final grade is computed as: total grade \* 60%

# Grading Criteria for Functional Qualities (70pt)

## User /8pt

1. Login Logout and Signup (6pt)
2. Unregister (2pt)

## Seller /12pt

1. Upload new products(2pt)
2. Edit products (2pt)
3. Replenishment/商品补货 (2pt)
4. Remove products from the shop (2pt)
5. Delivery (2pt)
6. View selling history(2pt)

## Buyer /20pt

1. View products (2pt)
2. Place an order (2pt)
3. Cancel an order (2pt)
4. Product receive (2pt)
5. Return (2pt)
6. Private message (3pt)
7. Comment (3pt)
8. View purchase history (2pt)
9. Wallet (2pt)

## Administer /6pt

1. Edit products and remove products (4pt)
2. View the selling history of all transactions (2pt)

## Goods /10pt

1. Image
2. Description
3. Price
4. # of product in stock
5. Category (Tag)

## **Supporting Features/13pt**

1. Search (3pt)

2. Navigation (3pt)

3. Deposit/交易资金暂存 (4pt)

(\* Before the shipment is confirmed, the money should be transferred to the system instead of the seller)

4. Shopping Cart (3pt)
