

Lecture 4-2 Discussion for lecture 4

Course piazza link:
piazza.com/shanghaitech.edu.cn/spring2021/cs270spring2021

To do list

- 1. Please use linear transform, non-linear transform and histogram equalization to improve the contrast of the provided images in the folder 'intensity_transform', compare the differences between each transform and think about why.
- 2. Please try to apply histogram matching to modify the color style of given images in folder 'histogram_matching'.
